

### Count in multiples

In Year 3 you need to count in multiples of 4, 8, 50 and 100.

Multiples of 4	Multiples of 8	Multiples of 50	Multiples of 100
0	0	0	0
4	8	50	100
8	16	100	200
12	24	150	300
16	32	200	400
20	40	250	500
24	48	300	600
28	56	350	700
32	64	400	800
36	72	450	900
40	80	500	1000

hundreds	tens	ones
3	5	2

- To find 10 more or 10 less, it is the 'tens digit' that changes  
 10 more than 352 becomes 362  
 10 less than 352 becomes 342

hundreds	tens	ones
3	5	2

- To find 100 more or 100 less, it is the 'hundreds' digit that changes  
 100 more than 352 becomes 452  
 100 less than 352 becomes 252

### Recognise place value

hundreds	tens	ones
3	5	2

352 means 300 + 50 + 2

### Numbers in words and figures

Hundred	Ten	ones
1	4	7
One hundred	forty	seven
One hundred and forty-seven		

Hundred	Ten	ones
4	0	9
Four hundred		nine
Four hundred and nine		

## Add 3 digit numbers mentally

### Partitioning

$$236 + 319$$

$$\begin{aligned} & \overbrace{200 + 30 + 6} + \overbrace{300 + 10 + 9} \\ &= 500 + 40 + 15 \\ &= 555 \end{aligned}$$

## Subtract 3 digit numbers mentally

$$363 - 126$$

### Partitioning

$$\begin{aligned} & \overbrace{363} - \overbrace{100} - \overbrace{20} - \overbrace{6} \\ &= 263 - 20 - 6 \\ &= 243 - 6 \\ &= 237 \end{aligned}$$

### Maths Frog

$$423 - 357 = 66$$

$$\begin{array}{ccccccc} & +3 & & +40 & & +23 & = 66 \\ \hline 357 & & 360 & & 400 & & 423 \end{array}$$

## Written method for subtraction

### Written method for subtraction

- Line up the digits in the correct columns

e.g.  $327 - 119$

$$\begin{array}{r} 3 \overset{1}{\cancel{2}} \overset{1}{7} \\ 1 \ 1 \ 9 \ - \\ \hline 2 \ 0 \ 8 \end{array}$$

## Estimate answers to calculations

- Round off each number
- Then do the calculation
- Check using the inverse

Example: Estimate  $83 - 28$

$$80 - 30 = 50$$

$$\text{Inverse: } 50 + 30 = 80 \checkmark$$

## Compare and order numbers

- Write numbers lining up the digits

Hundred	Ten	Ones
1	4	7
6	3	2
1	7	6
1	6	2

- Begin at the hundreds and compare

632 is the biggest

Hundred	Ten	Ones
1	4	7
<del>6</del>	<del>3</del>	<del>2</del>
1	7	6
1	6	2

- Move to the tens and compare
- Order is: 632, 176, 162, 147

## Written method for addition

- Line up the digits in the correct columns

e.g.  $132 + 239$

$$\begin{array}{r} 1 \ 3 \ 2 \\ 2 \ 3 \ 9 \ + \\ \hline 3 \ 7 \ 1 \\ \small{1} \end{array}$$

## Multiply using written methods

- A 2-digit number by a single digit

### Grid Method

x	20	3	
4	80	12	= 92

### Column Multiplication

$$\begin{array}{r} 38 \\ \times 3 \\ \hline 114 \\ \small{2} \end{array}$$

### Partitioning Method

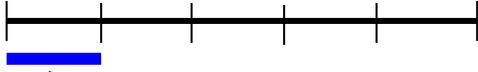

$$\begin{aligned} & 38 \times 3 \\ &= 30 \times 3 + 8 \times 3 \\ &= 90 + 24 \\ &= 114 \end{aligned}$$

## Fraction of line or objects

To find  $\frac{1}{5}$  of a line

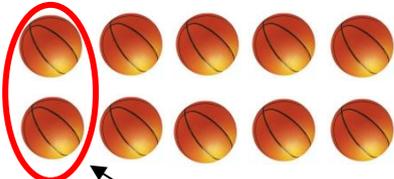

Divide the line into 5 equal parts

Each part is  $\frac{1}{5}$

To find  $\frac{1}{5}$  of a set of objects

Divide objects into 5 equal parts

Each part is  $\frac{1}{5}$

## Use fractions as numbers

To find  $\frac{1}{5}$  of 20 we do  $20 \div 5 = 4$

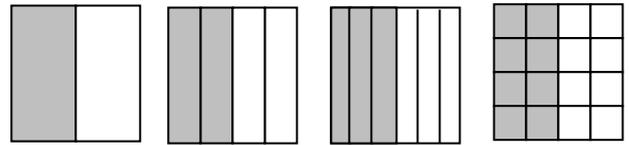

To find  $\frac{2}{5}$  of 20 we do  $4 \times 2 = 8$

To find  $\frac{3}{5}$  of 20 we do  $4 \times 3 = 12$

## Equivalent fractions

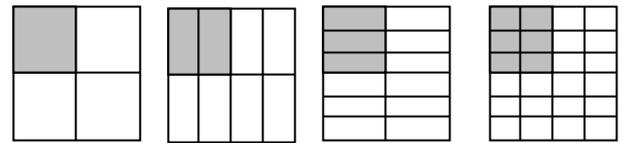

The same fraction can be expressed in different ways

ALL THESE ARE  $\frac{1}{2}$

$$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{8}{16}$$

ALL THESE ARE  $\frac{1}{4}$

$$\frac{1}{4} = \frac{2}{8} = \frac{3}{12} = \frac{6}{24}$$

## Add & subtract fractions

- To add and subtract fractions

When the denominators are the same

$$\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$$

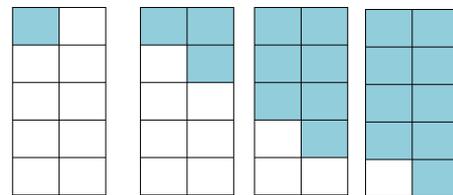

Do not add the denominators

$$\frac{5}{7} - \frac{1}{7} = \frac{4}{7}$$

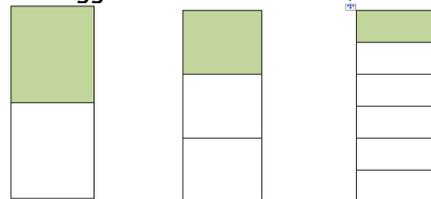

Do not subtract the denominators

## Compare fractions

$$\frac{1}{10} \quad \frac{3}{10} \quad \frac{7}{10} \quad \frac{9}{10}$$

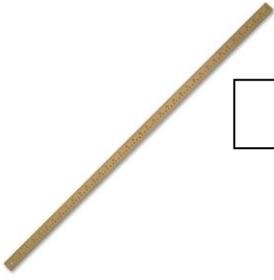

The bigger the denominator, the smaller the fraction

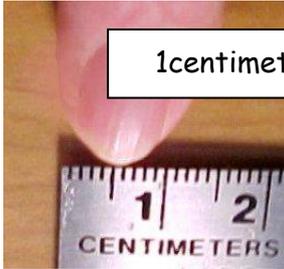

## Add & subtract measures

- The units must be the same

### Length - Example

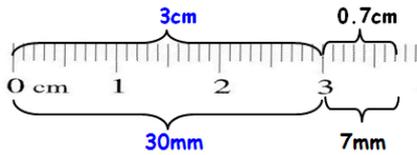

1 metre = 100 centimetres

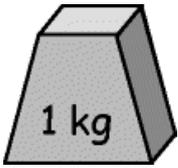

1 centimetre = 10 millimetres

$$3\text{cm} + 7\text{mm} = 30\text{mm} + 7\text{mm} \\ = 37\text{mm} \text{ or } 3\text{cm } 7\text{mm}$$

### Mass - Example

= 1000g

$$3\text{kg} - 450\text{g} \\ = 3000\text{g} - 450\text{g} \\ = 2550\text{g} \\ \text{or } 2\text{kg } 550\text{g}$$

### Add & subtract measures (continued)

### Volume - Example

1 litre = 1000 millilitres

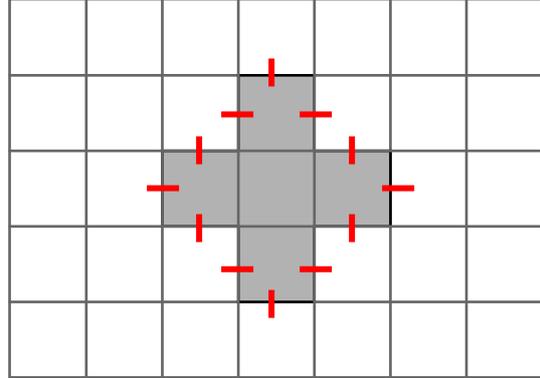

$$800\text{ml} + 720\text{ml} \\ = 1520\text{ml} \\ = 1 \text{ litre and } 520\text{ml}$$

## 20 Perimeter

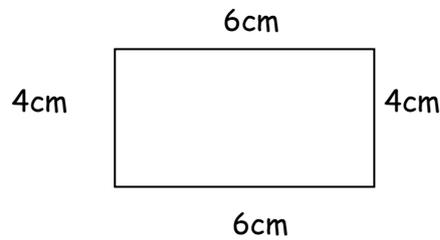

**PERIMETER** is the distance round the outside of a shape

- On a centimetre square grid - count round

Perimeter of this shape = 12cm

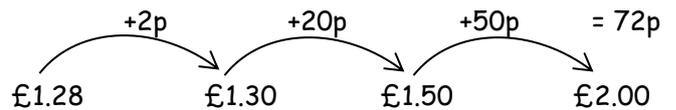

- Measurements given - add up all round

Perimeter of this shape =  $6 + 4 + 6 + 4 = 20\text{cm}$

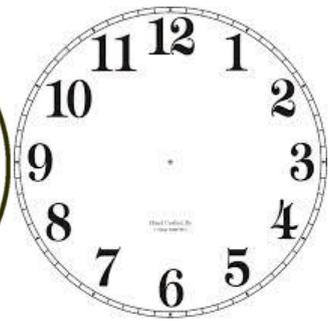

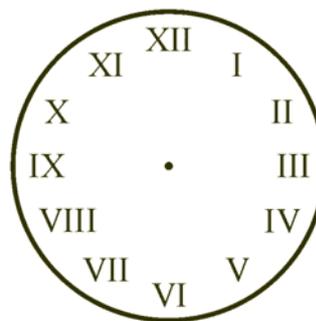

### Calculating Change

To find change use the counting up method.

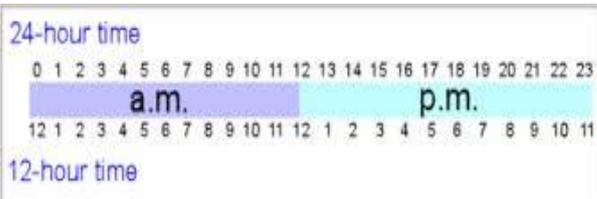

### Analogue clock

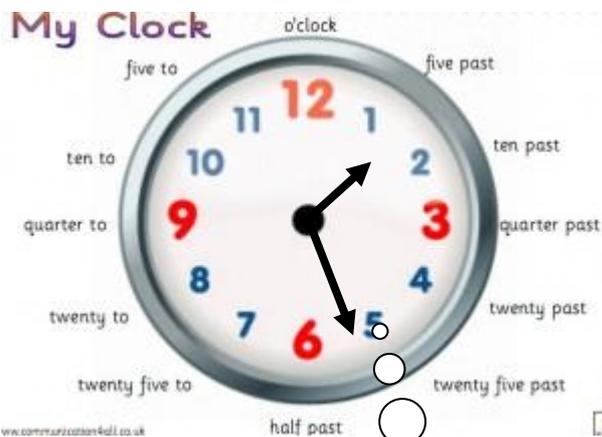

#### Roman

## 12- and 24-hour clock

### Reading the time

5 minutes between each number- so this time is 1:27 or we say 27 minutes past 1

## Months of the year

- A rhyme to remember the days in each month

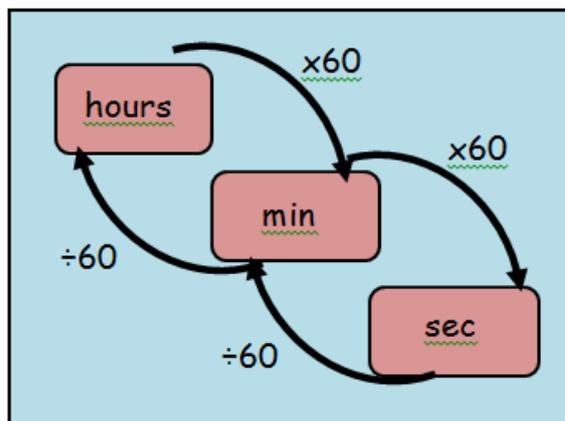

*30 days has September,  
April, June and November.  
All the rest have 31  
Except February alone,  
Which has 28 days clear  
And 29 in each leap year.*

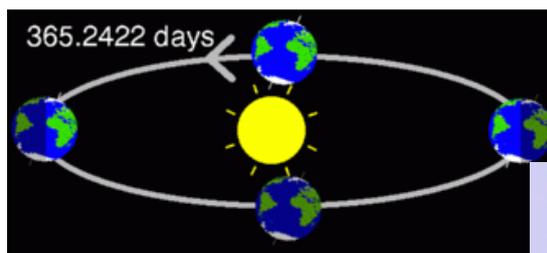

## Times of the day in 12-hour clock

Morning	Afternoon
12.00 midnight	12.00 noon
1.00 am	1.00 pm
2.00 am	2.00 pm
3.00 am	3.00 pm
4.00 am	4.00 pm
5.00 am	5.00 pm
6.00 am	6.00 pm
7.00 am	7.00 pm
8.00 am	8.00 pm
9.00 am	9.00 pm
10.00 am	10.00 pm
11.00 am	11.00 pm
12.00 noon	12.00 midnight

## Time - hours minutes, seconds

## Days in a year

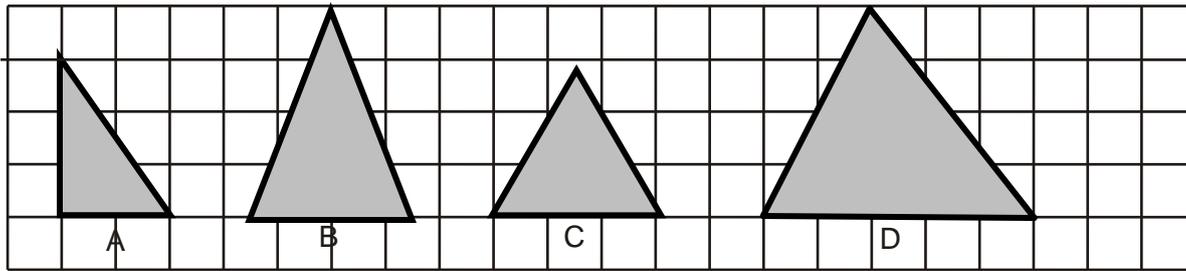

365 days in a year  
366 days in a leap year

## 2D Shapes

- With 3 sides (Triangles)

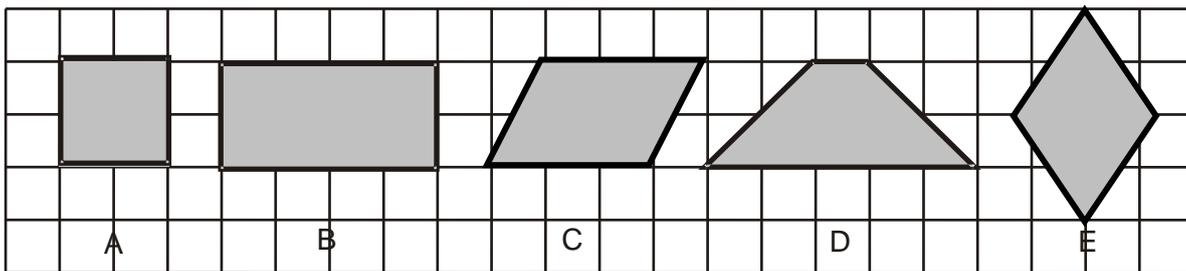

right-angled

isosceles

equilateral

scalene

- With 4 sides (Quadrilaterals)

square

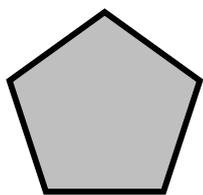

rectangle

parallelogram

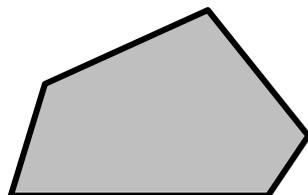

trapezium

rhombus

- With 5 sides (Pentagons)

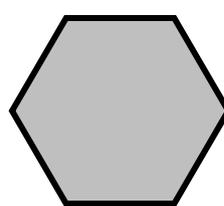

regular

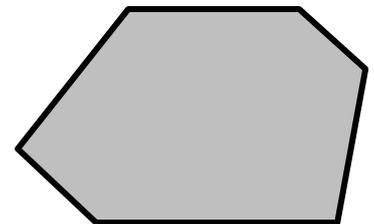

irregular

- With 6 sides (Hexagons)

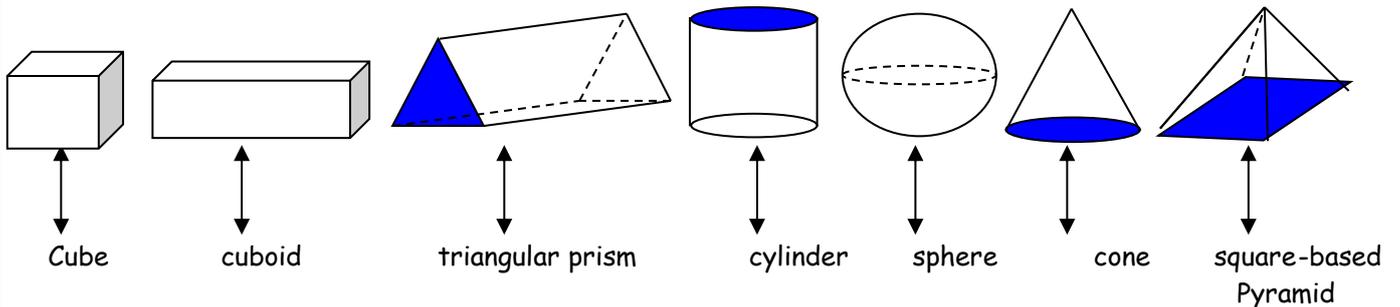

regular

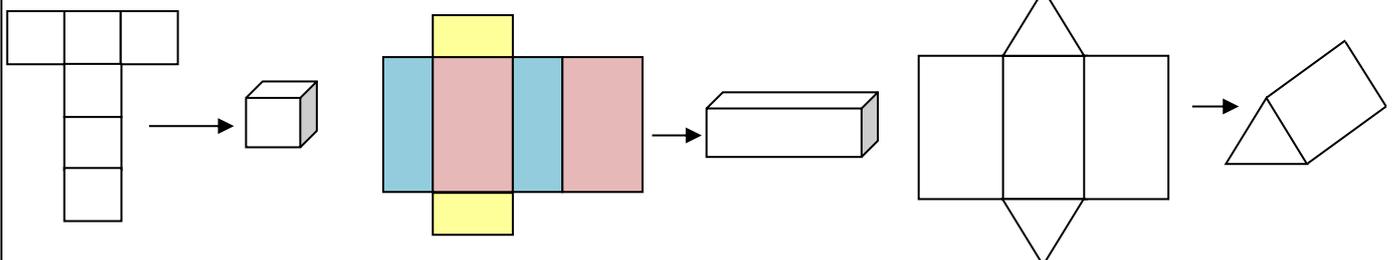

irregular

## 3/25 - 3D Shapes

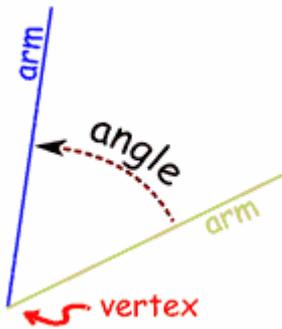

### - Nets

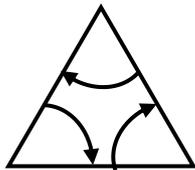

## Angle

- An angle is an amount of turn

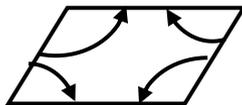

- Angles in shapes

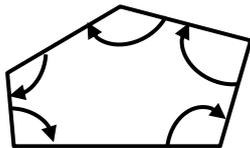

Triangle - 3 angles

Quadrilateral - 4 angles

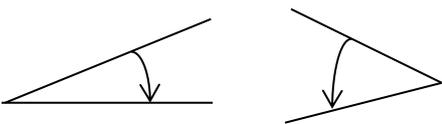

Pentagon - 5 angles

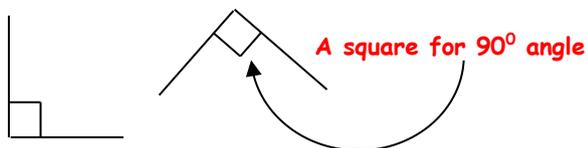

- Names of angles

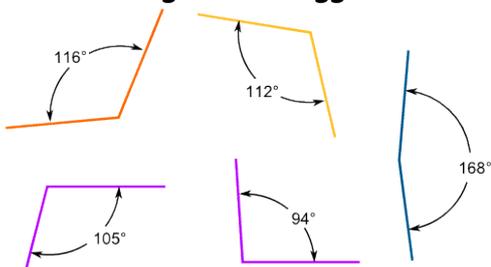

ACUTE angles are less than  $90^\circ$

RIGHT angles are exactly  $90^\circ$

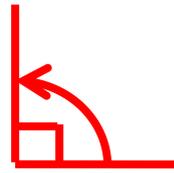

OBTUSE angles are bigger than  $90^\circ$

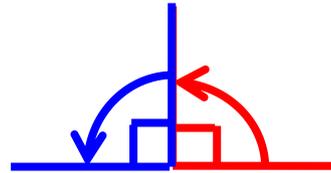

## 27 Right angles

ONE right angle measures exactly  $90^\circ$

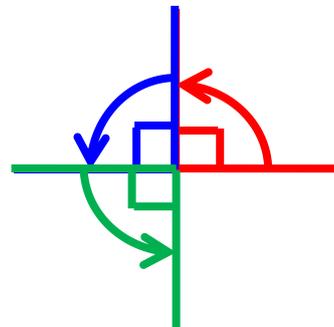

TWO right angles measure exactly  $180^\circ$

This is called a half-turn

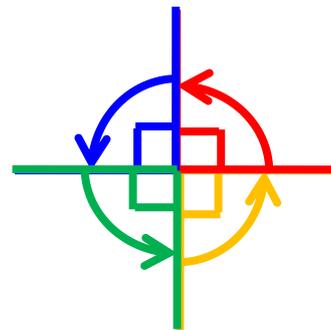

THREE right angles measure exactly  $270^\circ$

This is called three quarters of a turn

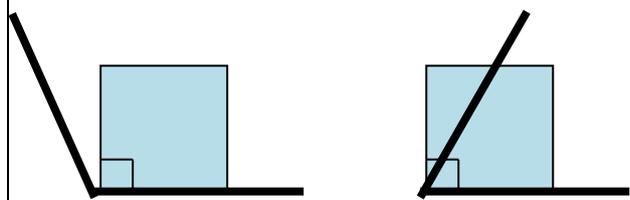

FOUR right angles measure exactly  $360^\circ$

This is called a full or complete turn

To check if an angle is bigger or smaller than a right angle, use a square corner

This angle is greater than a right angle

This angle is less than a right angle

## Types of Lines

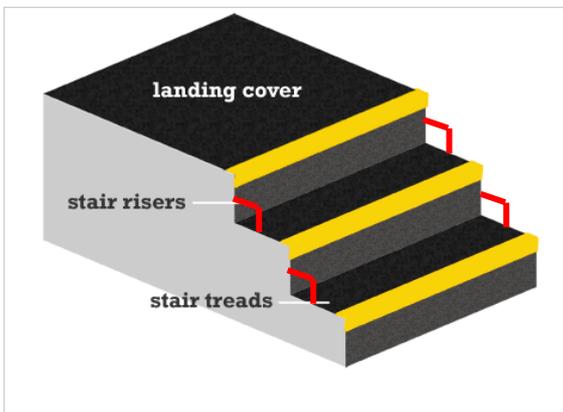

The Horizon is a horizontal line

This cliff face is a vertical line

The running track is parallel lines (never meet)

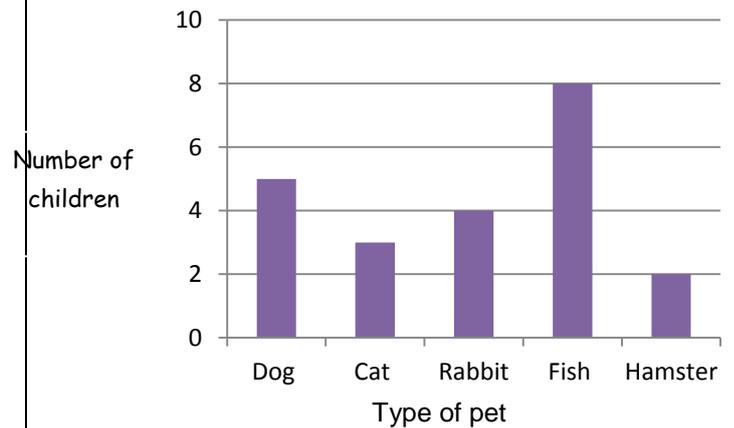

The rise & tread are perpendicular lines (meet at 90°)

## Bar charts

Frequency table to show pets owned by Year 3

Type of pet	Tally	Number of pets
Dog		5
Cat		3
Rabbit		4
Fish		8
Hamster		2

A bar graph to show pets owned by Year 3

Pictogram to show the colours in a tube of Smarties

Colour	Number of Smarties
Green	4 (3 full circles, 1 half circle)
Orange	4 (4 full circles)
Blue	3 (2 full circles, 1 half circle)
Pink	3 (3 full circles)
Yellow	6 (5 full circles, 1 half circle)
Red	4 (4 full circles)
Purple	4 (3 full circles, 1 half circle)
Brown	2 (1 full circle, 1 half circle)
	Key: ● = 2 smarties

## Solve answers to questions

- (i) How many more children own a rabbit than a hamster?  
 Answer:  $4 - 2 = 2$
- (ii) What is the difference between the number of children who own a dog and the number of children who own a cat?  
 Answer:  $5 - 3 = 2$
- (iii) How many pets are owned altogether by the children Year 3?  
 Answer:  $5 + 3 + 4 + 8 + 2 = 22$
